Mr. Starrs,

Yesterday I spoke with Sarah Peterson of the Office of AWEA Small Wind Advocate, and she thought you might be able to assist in my request. A local utility in Massachusetts (NSTAR) has filed draconian (for DG) standby rates, I have been asked to submit testimony on behalf of wind DG. In doing so I have been trying to see what arguments have been used in similar situations. Sarah thought you might know of other testimony for other utilities I could review on this issue. Any guidance you could provide would be appreciated. The testimony is due Tuesday, but needs to be completed early Monday March 15<sup>th</sup> so it can be reviewed and made sure it is complementary with similar testimony filed by Solar interests.

Thank you for your help in advance.

Tom
